

# Call for Papers

## General Chair

Masaki Aida, Tokyo  
Metropolitan University,  
Japan

## Program Chair

Junichi Funasaka,  
Hiroshima City University,  
Japan

## Program Committee

Andrea Ceccarelli,  
University of Florence, Italy

José Cecílio, Univ. of  
Lisbon, Portugal

Naoki Hirakura, Toyama  
Prefectural University,  
Japan

Yoshifumi Manabe,  
Kogakuin University, Japan

Yutaka Miyake, KDDI  
Research, Inc., Japan

Tatsuhiro Tsuchiya, Osaka  
University, Japan

To be added

## The Twenty-third International Workshop on Assurance in Distributed Systems and Networks (ADSN 2025)

Hakodate, Hokkaido, Japan, October 21–24, 2025

ADSN 2025 will be held in conjunction with the 23rd IEEE International Conference on Dependable, Autonomic and Secure Computing (DASC 2025), October 21–24, 2025. (see for details <https://cyber-science.org/2025/dasc/>).

ADSN 2025 is the twenty-third edition of this International Workshop demonstrating its long-term continuity and continuously received recognition. The objective of the Workshop is to provide an effective forum for original scientific and engineering advances in Assurance in Distributed Systems and Networks. Along with recent rapid growth of the Internet and ubiquitous networks, applications for autonomous decentralized systems are emerging in many important areas like transportation, automotive systems, smart energy grids and the Internet of Things (IoT) to name a few. In these distributed systems and networks, heterogeneous requirements are independently generated and the requirements themselves are frequently changing. Assurance in these distributed systems and networks is defined as capability of guaranteeing functional and non-functional system properties such as dependability, security, timeliness and adaptability in heterogeneous and changing environments. The workshop theme is critical in meeting ever more demanding requirements for assurance in systems and networks. Technologies supporting assurance including integration of various fields such as real time, fault tolerance, autonomy, mobility and intelligence will have to be incorporated in complex distributed systems and networks.

Topics of interest for this workshop include, but are not limited to:

- Assurance technologies for new generation networks
- Assurance in cooperative embedded, grid, and cloud computing systems
- Assurance in service-oriented and web-service based computing systems
- Critical infrastructure protection
- Coexistence and consistency technologies for heterogeneous systems
- Network control (QoS, QoE, CoS, etc) technologies for assurance
- Self-stabilization and assurance technologies for sensor networks
- Agents technologies for assurance
- Assurance in safety-critical automotive and avionic systems
- Software and hardware technologies for assurance in intelligent transportation systems, train control, and space computers
- System life-cycle assurance in specification, design, implementation, testing, verification, and validation
- Assurance in IoT systems
- Security technologies for assurance
- System management and proactive fault management technologies for assurance
- Technologies for achieving high assurance in complex systems

## Papers and Submissions

Papers must be written in English, and they have to be Postscript, PDF, or Word format. The complete manuscript should be no more than 6 pages [following IEEE conference proceedings style and guidelines](#). The following information must be provided on a cover sheet:

- (1) paper title, full name and affiliation of the author(s)
- (2) full name, affiliation, complete address, phone and fax numbers and email address of the author to be contacted, as well as
- (3) an abstract (up to 150 words)

All paper submissions will be handled electronically by the EDAS system. Our submission site will be open soon.

## Important Dates

Paper Submission Deadline: June 20, 2025

Acceptance Notification Date: August 11, 2025

Camera-ready deadline: September 12, 2025
