Call for Papers

General Chair
Masaki Aida, Tokyo
Metropolitan University,
Japan

Program Chair
Junichi Funasaka,
Hiroshima City University,
Japan

Vice Program Chairs
Eiji Utsunomiya, KRACE.,
Japan

Marcello Cinque, Federico
II University of Naples,
Italy

Program Committee

Yoshifumi Manabe,
Kogakuin University, Japan

Yutaka Miyake, KDDI
Research, Inc., Japan

Tatsuhiro Tsuchiya, Osaka
University, Japan

TBD

The Twenty-second International Workshop on Assurance in Distributed Systems and Networks (ADSN 2024)

Boracay Island, Malay, Philippines, November 5 - 8, 2024

ADSN 2024 will be held in conjunction with the 22nd IEEE International Conference on Dependable, Autonomic and Secure Computing (DASC 2024), November 5 – 8, 2024. (see for details https://cyber-science.org/2024/dasc/).

ADSN 2024 is the twenty-second edition of this International Workshop demonstrating its long-term continuity and continuously received recognition. The objective of the Workshop is to provide an effective forum for original scientific and engineering advances in Assurance in Distributed Systems and Networks. Along with recent rapid growth of the Internet and ubiquitous networks, applications for autonomous decentralized systems are emerging in many important areas like transportation, automotive systems, smart energy grids and the Internet of Things (IoT) to name a few. In these distributed systems and networks, heterogeneous requirements are independently generated and the requirements themselves are frequently changing. Assurance in these distributed systems and networks is defined as capability of guaranteeing functional and non-functional system properties such as dependability, security, timeliness and adaptability in heterogeneous and changing environments. The workshop theme is critical in meeting ever more demanding requirements for assurance in systems and networks. Technologies supporting assurance including integration of various fields such as real time, fault tolerance, autonomy, mobility and intelligence will have to be incorporated in complex distributed systems and networks.

Topics of interest for this workshop include, but are not limited to:
- Assurance technologies for new generation networks
- Assurance in cooperative embedded, grid, and cloud computing systems
- Assurance in service-oriented and web-service based computing systems
- Critical infrastructure protection
- Heterogeneous systems coexistence and consistency technologies
- Network control (QoS, QoE, CoS, etc) technologies for assurance
- Self-stabilization and sensor networks assurance
- Agents technologies for assurance
- Assurance in safety-critical automotive and avionic systems
- Software and hardware technologies for assurance in intelligent transportation systems, train control, and space computers
- System life-cycle assurance in specification, design, implementation, testing, verification, and validation
- Assurance in IoT systems
- Security technologies for assurance
- System management and proactive fault management technologies for assurance
- Technologies for achieving high assurance in complex systems

Papers and Submissions
Papers must be written in English, and they have to be Postscript, PDF, or Word format. The complete manuscript should be no more than 6 pages following IEEE conference proceedings style and guidelines. The following information must be provided on a cover sheet:
  (1) paper title, full name, affiliation of the author(s)
  (2) full name, affiliation, complete address, phone and fax numbers and email address of the author to be contacted, as well as
  (3) an abstract (up to 150 words)
All paper submissions will be handled electronically by the EDAS system.
(Similar to submission for DASC 2024)

Important Dates
Paper Submission Deadline: July 15, 2024
Acceptance Notification Date: August 15, 2024
Camera-ready deadline: September 15, 2024
